SECTION I – General Information

Introduction

In the construction industry time is money and delays associated with permitting and approvals add to the cost of projects. The permitting and zoning process can be cumbersome, frustrating and time consuming for those not familiar with the road map and nuances of the processes for each municipality and governmental agency. The creation of the *Guide to Permitting and Zoning* (Guide) for Antrim County is the result and collaboration of stakeholders in Northwest Lower Michigan to assist individuals and businesses involved with construction and development projects.

Purpose

The primary goals of the Guide are to both act as a **quick reference** as well as **educate** individuals, seasoned contractors, and developers with the know-how needed to access critical information in the approval process prior to applying for permits or undertaking a project within a county or municipality. The applicant or contractor should always contact the local Zoning Administrator, plan reviewer, or permit agent of the various agencies prior to beginning a project.

The Guide is not intended to be a “Do-It-Yourself” tool. Each project is different and following the flowcharts included in the Guide does not guarantee that a permit or approval will be issued at the end of the process. Applicants and Contractors are encouraged to seek the assistance of local professionals who have experience in dealing with the requirements of permits and approvals.

An understanding of the permitting and approval process will improve the efficiency of the process for both the private and public sector, in return creating a more successful project from the onset. More introductory information on the planning and zoning process is available in the New Designs For Growth *A Citizen’s Guide to Planning & Zoning*, which can be found at: www.nwm.org/citizensguide-planning

New Designs for Growth

“Development needs to go somewhere or it just goes everywhere and looks like anywhere”

-Quote from the NDFG Development Guidebook

Scenic views inviting lakes and streams, year-round recreational options, clean air, small town friendliness and overall quality of life...these are some of the many attributes stimulating rapid growth in the Northwestern Lower Michigan region. The vision of New Designs for Growth is to address this development expansion and help the region prosper in a way that protects the natural resources, scenic beauty, rural landscape and unique character of each community within the area.

As a model grassroots effort, which began in 1992 at the Traverse City Area Chamber of Commerce, New Designs for Growth (NDFG) has been a guiding force that has helped shape commercial and residential developments. As a collaborative team of community volunteers, advocates, planning and design professionals, developers and governmental representatives, the initiative continues to help shape the future of this region. NDFG is administered by the Northwest Michigan Council of Governments.

Following the Traverse City Area Chamber of Commerce’s goal to "preserve and enhance the quality of natural resources and environments as the basis of a healthy economy," New Designs for Growth goals are:

- Protect the natural and rural landscape character of the region
- Demonstrate how development can complement the natural landscape, farmland and scenic views
- Provide better alternatives for conventional development practices
- Reduce visual pollution
- Encourage good design beyond legal restrictions and minimum standards
- Promote renovation of existing substandard sites to reduce their negative impacts
- Promote preservation and improvement of historical and cultural resources
- Encourage the preservation and enhancement of hamlets, villages, and neighborhoods
- Promote more effective communication of design principles

New Designs for Growth goals dovetail perfectly with the statewide initiatives that are set forth through the Michigan Land Use Leadership Council’s Ten Tenets for Smart Growth.

Building upon a fourteen year history, the New Designs for Growth Development Guidebook reflects the latest trends and best management practices in designing sustainable communities and regions. It includes guiding principles in accordance with Michigan Land Use Leadership Council and Smart Growth policies, as well as research from a wide range of stakeholders. It contains specific examples of development practices that preserve and protect valuable land resources, while at the same time promoting economic strength and viability. The New Designs for Growth Development Guidebook is available in print and CD versions through contacting the Northwest Michigan Council of Governments Department of Planning and Community Development (www.nwm.org/planning/regional-planning/regional-planning-staff.html).

How to Use This Guide

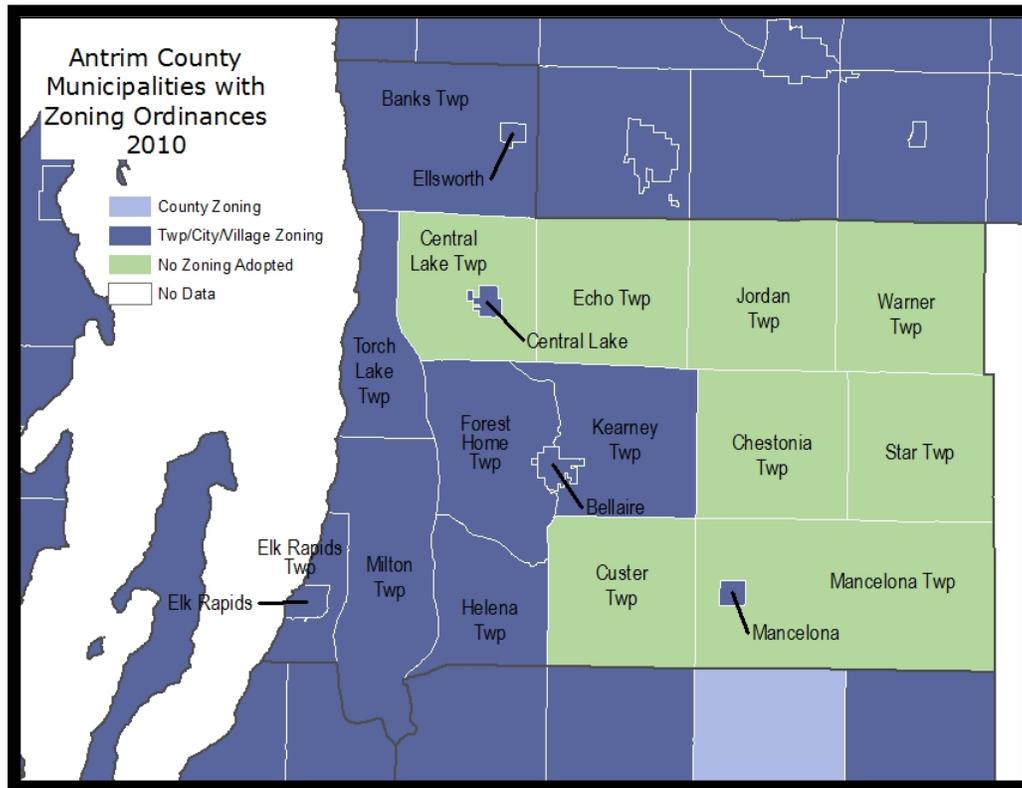

Flowchart Legend

The flowchart legend is provided to understand the color coding of flowcharts that may be contained under a specific unit of government’s listing in this guide. It also provides generic examples of the types of steps that may be contained in various land use permit processes. However, it is not intended to represent a specific unit of government’s permitting process. If the specific unit of government you are interested in does not contain a permitting process flowchart, please contact the zoning administrator for specific application process information.

*NOTE – The flowcharts included in this guide are for educational purposes on the general process (i.e. permitted uses) and following them does not guarantee a permit or approval. Please use contact information provided for each municipality included in this document for specific permitting direction.

Antrim County Governmental Units

As you can see from the zoning map shown above, there are 5 incorporated villages and 7 townships that are zoned in Antrim County, while 8 townships have no zoning. County, village and township websites containing government contacts, zoning ordinances, master plans and more can be found at: www.newdesignsforgrowth.com/pages/smartgrowthresources/northwestlowermichiganmunicipalplanningresources/.

Antrim County Permitting & Zoning: Special Requirements

There are a few requirements that affect building/development activities in certain areas of the county, even where there is no zoning ordinance.

- The County Building department recommends building 10 feet from the property line, but this is not a requirement.
- If developing within 500 feet from a lake, river, or regulated wetland, developers have to get a soil erosion permit from county.
- There is a special building ordinance if you are within a 10 mile radius of an airport. The ordinance limits the height of a building – developer must go to the airport for a special permit. 18 page Airport Ordinance located on the county website:
www.antrimcounty.org/downloads/airport_zoning_ordinance_3.pdf
- State requires a special permit for building within 500 feet of the Jordan River. Applicants must go to the committee and get a permit. Contact: DNRE Zoning Administrator Brian Bury @ 989-732-3541 x 5088.
- If you build within Lakes of the North (www.lakesofthenorth.com/), the association has their own rules and regulations related to building activities. This is not a zoning requirement, but it does affect what and where you can build.

Other than the items listed above, if developer builds or develops in an Antrim County township or village with no zoning ordinance, developer must garner a building permit only.
