Proposal Evaluations

- The Army conducts a rigorous two-tier evaluation of proposals received in response to a solicitation topic and selects proposals that best satisfy Army needs
- Proposals are evaluated by subject matter experts using the following criteria, which are published in the Solicitation:
 - Technical Feasibility
 - Strength of the Personnel & Facilities
 - Transition Potential
- Each proposal is evaluated on its own merit and not evaluated against other proposals
- The Army SBIR process is very competitive with 10% of the Phase I proposals submitted being selected and 50% of those being selected for Phase II

Phase II Proposals

- Commencing with Phase II's originating from 13.1 Phase I's, invitations are no longer required to submit a Phase II proposal. Submission of Phase II proposals originating from 12.3 and earlier solicitations will remain by invitation only. The Phase II submission process for 13.1 and subsequent solicitations are described below.
- Phase II proposals can be submitted by Phase I awardees only within one of four submission cycles shown and must be submitted between 4 to 17 months after the Phase I contract award date. Any proposals that are not submitted within these four submission cycles and before 5 months or after 17 months from the contract award will not be evaluated.
- Army Phase II Proposals submitted containing a Technical Volume over 38 pages will be deemed NON-COMPLIANT and will not be evaluated.
- For additional Phase II Proposal submission guidelines and submission cycles, please refer to the Army SBIR Public website: https://www.armysbir.army.mil/sbir/PhaseII.aspx
