

Interested in **\$22,500** of grant funding to help with your business's cybersecurity?

Operated in partnership with the Economic Growth Institute at the University of Michigan, the Michigan Defense Center, an operation of the Michigan Economic Development Corporation, is offering small and medium - sized defense contractors a comprehensive one-stop shop to Department of Defense (DoD) cybersecurity compliance to help secure the defense industrial base—and your business.

This two-phase program has pre-qualified Michigan contractors to provide cybersecurity technical services to assist with the implementation of NIST SP 800-171 required for meeting the DFARS 252.204-7012 regulation required in all United States DoD and Homeland Security (DHS) contracts.

Phase 1

Michigan small and medium - sized businesses can contract with the pre-approved vendor list to develop a gap analysis report at a pre-negotiated discounted cost of **\$1,500** as the first step towards cybersecurity compliance.

Phase 2

After completing Phase 1 businesses may qualify for up to **\$22,500** in grant funding to address any deficiencies identified and to assist them in becoming fully compliant.
